

Leakage is prevented by a double sealing on the exhalation valve and with a soft, flexible mask sealing

High air flow capacity and low breathing resistance increases the diver's performance and endurance

Equipped with attachment points for accessories and prepared for underwater communication

Ambient air hatch, pull to open and push to close

The breathing valve will perform even in extreme conditions: mud, oil and fast flowing cold currents won't have a serious impact on performance

Low dead space volume to minimize CO₂ build up

The Divator™ Full Face Mask

The future of diving has history written all over it

Every day this mask stands up to the toughest diving conditions. Through decades of innovation and refinement, it has mastered the secrets of the sea. Users have saved both man and beast, seen dictatorships fall and freedom rise, even greeted astronauts returning from the Moon by way of ocean landing. It might be old news for professionals around the world, but performing well where others fail never gets old.
