

The Divator™ DP1

The right kind of pressure for professional divers

Nothing beats surface supply diving in regards to safety. But bulky hoses and complicated systems, makes it a hassle for both divers and attendants. To simplify things, we designed the world's first high pressure surface supply system. With the hose weighing in at just a fraction of a traditional low pressure hose, it's much quicker and easier to handle. And since the regulator is incorporated with the diver's equipment, there is no need for the attendant to manually adjust the pressure – letting the whole team focus on the mission at hand.
