Non-return valve discs for S-Face Mask

LIDINGÖ December 21, 2007

ANNOUNCEMENT

All versions of the S-Face Mask will be fitted with red valve discs.

APPLIES TO

All S-Face Masks.

DESCRIPTION

Two non-return valve discs are mounted on the inner mask of the face mask. Until now these valve discs have been either black or red depending on mask version. S-Face Masks will gradually start to be delivered with red valve discs from January 2008.

The red valve discs have proven to further increase the performance of the S-Face Mask on all versions.

The two different valve disc types are fully interchangeable and there is no need to prematurely replace black discs. However, one mask shall have either only black or only red valve discs.

*Black valve disc
(one on each side of the mask)*

*Red valve disc
(one on each side of the mask)*

ORDERING INFORMATION

The red valve discs are available as a 10-pack with item number 336890132.
