

Divator Steel cylinder 6L

When mounted on Interspiro's carrying devices the Divator Steel cylinder has the cylinder valve facing downward. This gives the advantage to have no valves or hoses behind the diver's head, greatly reducing snagging hazards. The valve down configuration simplifies the handling and allows the diver to reach the valve and all hoses even when wearing a restricting dry suit.

There is a fast and easy connection interface to Divator harness or Divator BC/BCW.

Technical specification

Approval : 2014/68/EU (Pressure Equipment Directive)

Standard : ISO9809-2

Material : Steel - CrMo

Connection : M18 x 1.5 neck thread

Service life : Unlimited

Working pressure : 300 bar

Test pressure : 450 bar

Breathing gas : Breathing air (EN12021)

Volume : 6.0 L

Length : 560 mm (including valve)

Diameter : 140 mm

Weight : 7.6 kg
